

“What’s the difference between 1d6 and 2d6 ballpark cards?”

Our **1d6 cards** were our original ballpark card design. They are the same size as our regular batter and 6x6 pitcher cards (about 3.5”h x 2.5” w).

They work by rolling **one six-sided die (1d6)** and checking the ballpark card on any batter card shaded squares, to see how the ballpark influences the final play result.

Note: You can learn more about how the ballpark cards work in the game by reading our Intro and Rules PDF, available on the baseball extras page of our website.

They work by rolling **two six-sided dice (2d6)** and checking the ballpark card on any batter card shaded squares, to see how the ballpark influences the final play result.

Both types of ballpark cards can produce accurate play results and are fun to use! So it’s just a matter of personal preference. Both versions are available for most seasons.
