Instructions for saving park photos to have them appear in the PC game:

After extracting the zip file you should have photos in three folders: Background, Cards, Entrances.

Photos in the Background folder need to be saved to your Baseball\Pictures\Parks folder.

Photos in the Cards folder need to be saved to your Baseball\Pictures\Parks\Cards folder.

Photos in the Entrances folder need to be saved to your Baseball\Pictures\Parks\Entrances folder.

It is also possible to create your own photos for display within the game by naming the new photo (a .jpg file) according to the naming convention explained in the Help-Graphics tab within the PC game.

If there is more than one photo for the same park and folder, the file names will require a letter designation (a, b, c, etc.) at the end of the file name (e.g. SunTrust ParkE_2017-2025a).
